## HELP PLAN YOUR COMMUNITY'S FUTURE!

*Ever wonder about the future of your community and surrounding area? - What does it look like? Who's living here? What kinds of businesses and industry activities are going on? What types of recreational activities are available to do throughout the seasons? These are the types of questions we want to ask you.*

Over the past year, the Rural Municipalities of Mariposa No. 350, Progress No. 351, Reford No. 379, and Tramping Lake No. 380 and the Towns and Villages of Luseland, Landis, Kerrobert, Scott, Macklin and Denzil are building on foundational work that began with the development of the North West Resource Corridor Planning District. These municipalities are working inter-municipally to create a District Official Community Plan - a comprehensive planning framework for our future.

As a member of this community your opinions, values and input are most important. We, Town Council and Administration, recognize this and believe sharing the direction of our community's vision, goals and opportunities belongs to us all. We would like to invite you to participate in one of the upcoming Open House community planning meetings at the following locations on **Wednesday January 25, 2012**.

**Town of Macklin (location TBD) from 11:30 am - 1:00 pm**

**Town of Luseland – Pioneer Club (601 Grand Avenue) from 7:00 pm – 9:00 pm**

This is one of many community planning meetings that have been hosted in the North West Resource Corridor. Whether you have attended none, one or all meetings, **everyone is welcome!** Bring your family and friends to discuss and build upon the work we have done to date based around the following planning themes:

- Land use: Residential, Commercial and Industrial
- Infrastructure
- Transportation
- Natural Resources and Ecological Sensitivities
- Recreational and Cultural Opportunities
- Community Economic Development and Tourism Potential
- Social Development – Health/Safety/Education
- Inter- municipal Co-operation

Representatives from our planning consultant firm, Prairie Wild Consulting Co., will be facilitating the Open House planning meetings, and will be attending community events in the area to update and engage the public in this process.

If you have any further questions please contact:

Samantha Mark, WCER:
