

# Important Notice

Due to the Covid-19 virus, we at Thompson Bearing want to do our part to curb the effects of this virus. We have taken steps in house to protect the safety of our valued staff and customers.

We have increased cleaning and disinfection within our building. We have instructed our employees to follow Public Health Agency of Canada guidelines about social distancing to help slow the spread of the coronavirus. This includes frequent hand washing, staying home when sick, covering coughs and sneezes.

At this time our doors will remain open to the public for necessary needs, but please stay in the designated area by the front main door while we grab the parts and ask that they keep a safe distance from our staff. We're limiting access to our facilities, only Thompson Bearing personnel are allowed in the back shop, all doors will be locked, and all customers must stay within our taped area for everyone's protection.

When in need of parts please phone in prior to arrival so we can have what is needed ready to go and be able to serve you quicker at this time.

In regards to payments, for those customers that don't already have an account with us providing payment already, we will be accepting Visa, Mastercard and Ag-card as per usual. Either over the phone, or the Parts Personal will enter in the card number by hand to lessen usage of the keypad.

Thank you for your support and understanding.
